Listing of Claims:

Please cancel claims 1-25.

1 26. (New) A recharging device comprising a portable charger, said charger
2 comprising
3 a connection to a source of electrical power,
4 a plurality of connection points for items of portable rechargeable equipment for
5 different uses, and
6 an adapter, being powered by said source of electrical power and adapting it to
7 provide recharging power for the items of portable rechargeable equipment, said adapter
8 comprising
9 a microprocessor and
10 a multi-voltage converter supplying voltages and currents adapted to said items of
11 equipment to be recharged, said adapter adapting the charging power to the item of portable
12 equipment as a function of a charging program supplied to said charger, the device further
13 comprising a plurality of items of portable rechargeable equipment for different uses connected
14 to said charger, the charger adapting a receiving item of portable equipment to a source item of
15 portable equipment.

1 27. (New) The device according to claim 26, wherein the charger is adapted
2 to detect, and signal by a visual or aural signal, an incorrect status of a connection contact.

1 28. (New) The device according to claim 26, wherein said items of equipment
2 each have their own recharging program.

1 29. (New) The device according to claim 26, wherein a first item of equipment
2 is connected to a second item of equipment, the first item of equipment connecting the second
3 item of equipment to the charger.

1 30. (New) The device according to claim 29, wherein the second item of
2 equipment is charged via the first item of equipment.

1 31. (New) The device according to claim 26, wherein the device further
2 comprises a computer connected to said charger, said adapter adapting charging power to the
3 item of portable equipment as a function of a charging program supplied by said computer.

1 32. (New) The device according to claim 31, wherein said computer
2 recognizes the item of portable equipment to be recharged.

1 33. (New) The device according to claim 32, wherein the computer is adapted
2 to download a charging program from the Internet.

1 34. (New) The device according to claim 31, wherein the link between the
2 computer and the charger is of the USB type.

1 35. (New) The device according to claim 26, wherein the item of receiving
2 equipment is adapted to be charged on the item of source portable equipment via said charger
3 (10).

1 36. (New) The device according to claim 35, wherein said item of source
2 equipment is adapted to trigger a switching function in said charger and to only enable switch-
3 over to generator mode when there is a connection of said item of source equipment to said
4 charger.

1 37. (New) The device according to claim 35, wherein said charger further
2 comprises a converter adapting the charging power of said item of source equipment to said item
3 of portable receiving equipment.

1 38. (New) The device according to claim 35, wherein said items of equipment
2 supply said charger or other items of portable equipment with their charging program by wireless
3 link.
